Changes to the Climate Change Levy (CCL) From 1st April 2021, the Government changed the Climate Change Levy (CCL) rate to 0.775p/kWh for electricity and 0.465p/kWh for gas. This means that for any energy used where the CCL applies, it will be charged for at the new rate. You should review your entitlement to claim CCL reliefs to ensure that any reduction claimed continues to be correct and notify E.ON if any changes are required. How do you calculate kilowatt-hours of gas?

We measure the gas you use in m³, but like all gas suppliers we have to charge for your gas in kilowatt-hours.

So we use the calculation below to convert m³ into kilowatt-hours:

- 1 We multiply the m³ used by the conversion factor 1.000000
- 2 We then multiply this by the calorific value (see new charges on the left)
- 3 We then convert this into kilowatt-hours by dividing by 3.6

We measure the gas you use in m³, but like all gas suppliers we have to charge for your gas in kilowatt-hours.

So we use the calculation below to convert m³ into kilowatt-hours:

- 1 We multiply the m³ used by the conversion factor 1.000000
- 2 We then multiply this by the calorific value (see new charges on the left)
- 3 We then convert this into kilowatt-hours by dividing by 3.6
